

MOMENTUM

Empowering Users to Build
and Maintain Healthy Habits

Mussie Abraham, Rashfiqur Rahman, Afzal
Khan, Labeeb Alam

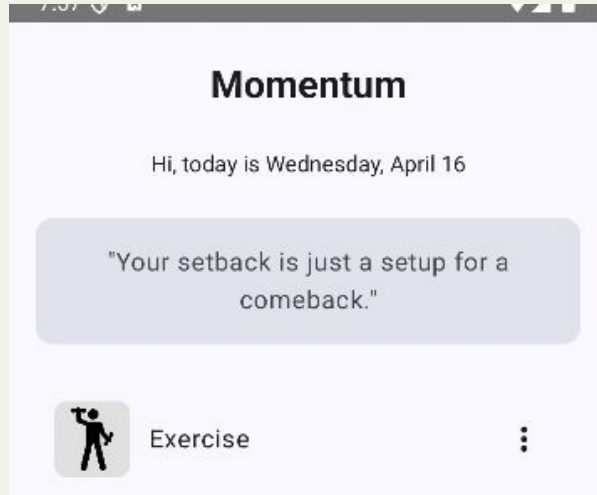

Progress & Functionality

- ❑ Adaptive layout for landscape and portrait orientations
- ❑ Toggleable weekly and monthly calendar views
- ❑ Integrated motivational quotes using the ZenQuotes API
- ❑ Habit tracking with Room database support
- ❑ Users can create new habits
- ❑ Semi working watch compatibility

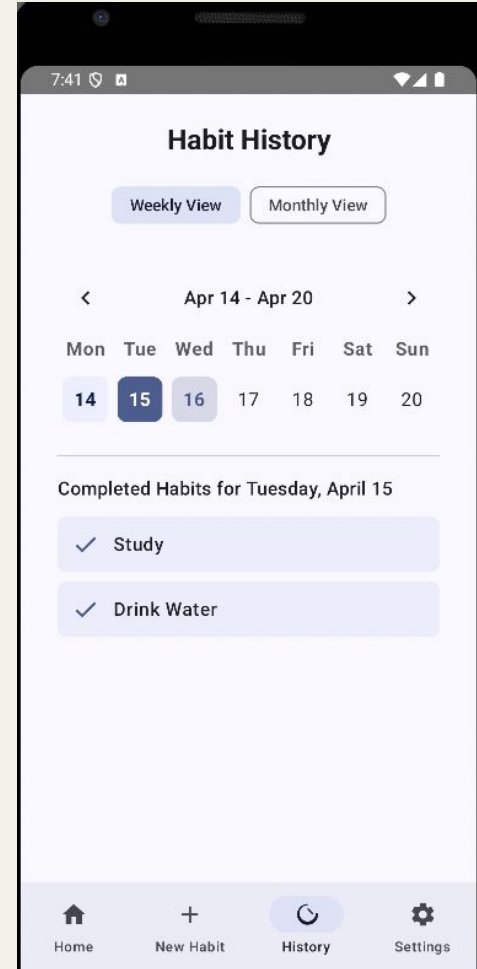

API Integration

- ❑ Used ZenQuotes API in the home page to share motivational quotes whenever the app is opened

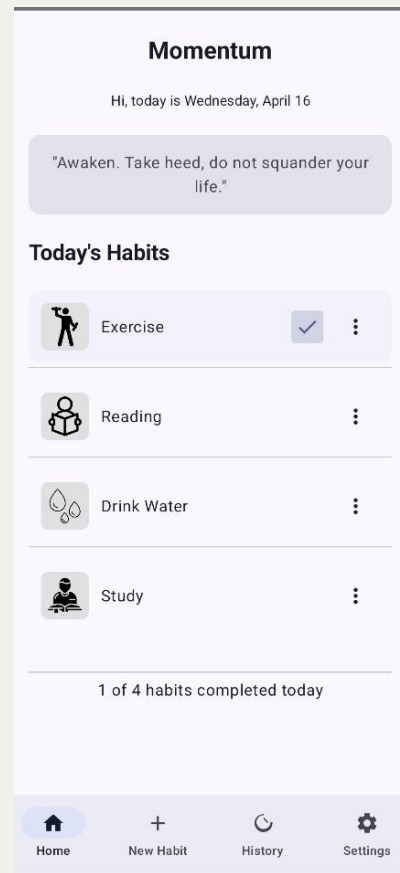

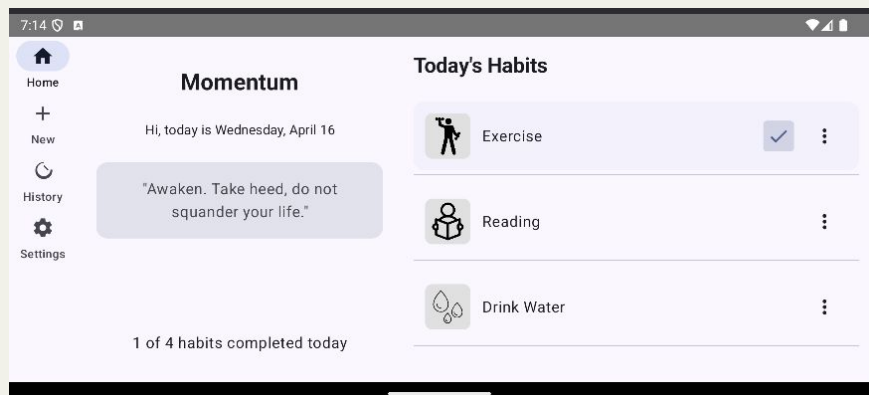

Weekly & Monthly View

- ❑ Displays a weekly/monthly view of the calendar
- ❑ Highlights dates where habits were completed using color indicators
- ❑ Shows a list of completed habits for the selected date below the calendar
- ❑ Current timestamp on local device is retrieved using: `System.currentTimeMillis()`

Landscape/Portrait Orientation

- ❑ Portrait uses vertical layout with bottom navigation
- ❑ Landscape uses horizontal layout with side navigation
- ❑ isLandscape flag controls the layout switch

Database

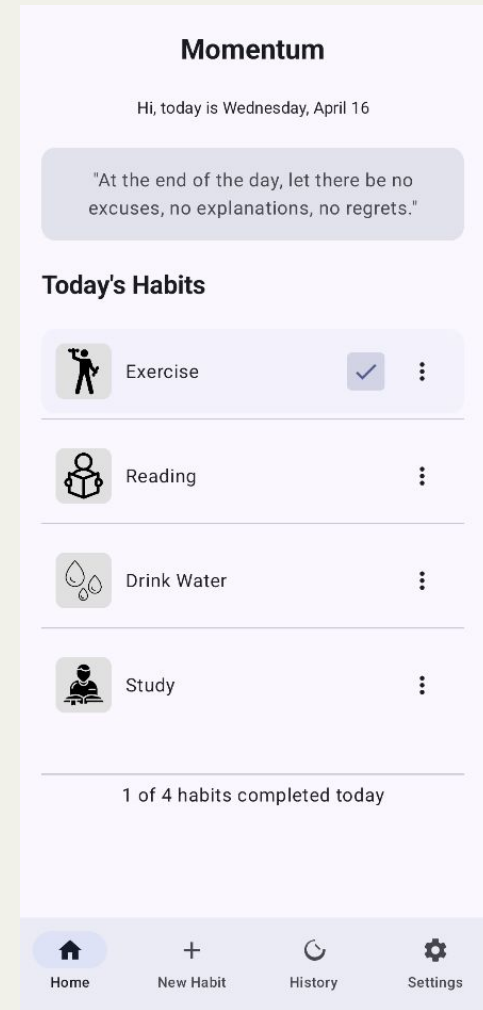

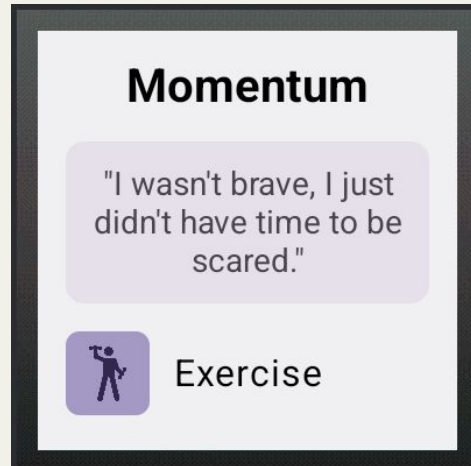

- ❑ Room DB Integration
- ❑ Table for Habits and Completed Habits

Multi-Device Support

- ❑ Phone (Pixel 8)
- ❑ WearOS Square Watch (in progress)

Potential Future Steps

- ❑ Implement user authentication with login and logout support
 - ❑ Enables us to map users to their tracked habits
- ❑ Integrate step counter visuals and functionality for both watch and phone
- ❑ Complete the watch UI and remaining features

Documentation

Database Schema (RoomDB):

- **Planned:** associate habits with a unique user ID once user accounts are added in a later sprint

APIs Integrated:

- ZenQuotes API provides a motivational quote on app launch (fully implemented)
- Planned: Google Calendar API to enhance the History tab UX

Code Organization & Project Structure:

- Separate modules for Pixel (phone) and Wear OS (watch), cleanly linked via Gradle

Challenges:

- Balancing minimal UI with functionality across landscape and watch views

Demo Time!
